INDEX TO VOL. LXXXII. (A)

Absorption spectra of solutions, mechanism of (Houstoun), 606.
Address of the President, November 30, 1908, 1.
Air and carbon dioxide, specific heats of (Swann), 147.
Allen (H. S.) The Photo-electric Fatigue of Zinc.—II, 160.
α-Particles, diffuse reflection of (Geiger and Marsden), 495.
Aluminium-copper-tin, liquidus curves of (Andrew and Edwards), 568.
Andrew (J. H.) and Edwards (C. A.) The Liquidus Curves of the Ternary System:—Aluminium-Copper-Tin, 568.
Atmosphere, isothermal layer of, and atmospheric radiation (Gold), 43.

Baird (A. W.) Obituary notice of, xvii.
Bairstow (L.) The Elastic Limits of Iron and Steel under Cyclical Variations of Stress 483.
Barnes (H. T.) The Absolute Value of the Mechanical Equivalent of Heat, in Terms of the International Electrical Units, 390; —— and Shaw (A. N.) A Phenomenon connected with the Discharge of Electricity from Pointed Conductors, 336.
Baxandall (F. E.) See Lockyer and others.
Beilby (G. T.) Surface Flow in Calcite, 599.
Bell (James) Obituary notice of, v.
Berkeley (Earl of) and Hartley (E. G. J.) "Dynamic" Osmotic Pressures, 271.
β-Rays, absorption by matter, and relation to velocity (Wilson), 612.
Bohr (N.) Determination of Surface-tension of Water by Method of Jet-vibration, 146.
Boiling-points of metals, determination of (Greenwood), 396.
Botallek Stone Circles, observations of sun and stars in (Lockyer), 96.
Butler (C. P.) See Lockyer and others.

Calcite, surface flow in (Beilby), 599.
Cathode rays, velocity of, from substances exposed to γ-rays of radium (Kleeman), 128.
Collie (J. N.) Note on a Curious Property of Neon, 378.
Conductors, electrified spherical, coefficients of capacity, etc., of, when close together (Russell), 524.
Cracks, extension of, in an isotropic material (Mallock), 26.
Crowther (J. A.) On the Passage of Röntgen Rays through Gases and Vapours, 103; —— On the Effect of Temperature on Ionisation, 351.

Darwin (Sir G. H.) Note on the Stability of Jacobi's Ellipsoid, 188.
Devonshire (Duke of) Obituary notice of, xi.
Diamond, conversion into coke by cathode rays (Swinton), 176.
Dielectric constants, measurement of, by oscillations in a field of force (Thornton), 422.
Dixon (A. L.) Some Results in the Theory of Elimination, 384.
Dyes, absorption spectra of dissolved (Sheppard), 256.

Earth, yielding of, to disturbing forces (Love), 73.
Earth's precessional nutation, relation to resistance against tidal deformation (Larmor), 89.
Edwards (C. A.) See Andrew and Edwards.

Electric arc, rotation of, in radial magnetic field (Nicol), 29.
Electricity, a phenomenon connected with discharge of, from pointed conductors (Barnes and Shaw), 336 ; (Zeleny), 349 ; —— effect of hydrogen on discharge of, from hot platinum (Wilson), 71 ; —— of rain and thunderstorms (Simpson), 169 ; —— passage of, through gaseous mixtures (Wellisch), 500.
Electro-optical effects, attempt to detect (Wilson), 224.
Electrostatic induction through solid insulators (Wilson), 409.
Elimination, results in theory of (Dixon), 384.
Ellery (R. L. J.) Obituary notice of, vi.

Flame, effect of magnetic field on electrical conductivity of (Wilson), 595
Fresnel's integrals, graphical determination of (Shaxby), 331.

Geiger (H.) The Ionisation produced by an α-Particle.—Part I, 486 ; —— and Marsden (E.) On a Diffuse Reflection of the α-Particles, 495.
Gibson (A. H.) On the Depression of the Filament of Maximum Velocity in a Stream flowing through an Open Channel, 149.
Gill (Rev. H. V.) On a New Kind of Glow from Palladium in Vacuum Tubes, 464.
Gold (E.) The Isothermal Layer of the Atmosphere and Atmospheric Radiation, 43.
Grant (K.) See Steele and Grant.
Gray (J. A.) Liberation of Helium from Radio-active Minerals by Grinding, 301.
Greenwood (H. C.) An Approximate Determination of the Boiling Points of Metals 396.

Harrison (W. J.) The Decay of Surface Waves produced by a Superposed Layer of Viscous Fluid, 477.
Hartley (E. G. J.) See Berkeley (Earl of) and Hartley.
Haselfoot (C. E.) The Charges on Ions produced by Radium, 18.
Havelock (T.) The Wave-making Resistance of Ships : a Theoretical and Practical Analysis, 276.
Heat, absolute value of mechanical equivalent of (Barnes), 390.
Heats, specific, of air and carbon dioxide (Swann), 147.
Helium, leakage from radio-active minerals (Strutt), 166 ; —— liberation of, from radio-active minerals by grinding (Gray), 301.
Henderson (J. B.) The Flight of a Rifled Projectile in Air, 314.
Houstoun (R. A.) On the Mechanism of the Absorption Spectra of Solutions, 606.
Hunter (J. de G.) An Apparatus for Measurements of the Defining Power of Objectives, 307.
Hydrogen, wave-lengths of lines in secondary spectrum of (Watson), 189.

Induction, electrostatic, through solid insulators (Wilson), 409.
Ionisation, effect of temperature on (Crowther), 351 ; —— by secondary γ-rays (Kleeman), 358 ; —— produced by an α-particle (Geiger), 486.
Ions, mobilities of, produced by Röntgen rays (Wellisch), 165.
Iron and steel, elastic limits, under cyclical variations of stress (Bairstow), 483.
Isaac (F.) See Miers and Isaac.

Jacobi's ellipsoid, note on stability of (Darwin), 188.

Kerr (John) Obituary notice of, i.
Kleeman (R. D.) On the Velocity of the Cathode Rays ejected by Substances exposed to the γ-Rays of Radium, 128 ; —— The Ionisation in various Gases by Secondary γ-Rays, 358.

Larmor (J.) The Relation of the Earth's Free Precessional Nutation to its Resistance against Tidal Deformation, 89.
Light, angular momentum in beam of circularly polarised (Poynting), 560.
Liquidus curves of ternary system—aluminium-copper-tin (Andrew and Edwards), 568.
Lockyer (Sir J. N.) Notes on Observations of Sun and Stars in some British Stone Circles. Fourth Note.—The Botallek Circles, St. Just, Cornwall, 96; —— (and others) On the Origin of certain Lines in the Spectrum of ϵ Orionis (Alnitam), 532.
Lodge (Sir O.) and Muirhead (A.) Syntonic Wireless Telegraphy; with Specimens of Large-scale Measurements, 227.
Love (A. E. H.) The Yielding of the Earth to Disturbing Forces, 73.

Makower (W.) See Russ and Makower.
Mallock (A.) The Extension of Cracks in an Isotropic Material, 26; —— Best Conditions for Photographic Enlargement of Small Solid Objects, 181; —— Utilisation of Energy stored in Springs for the Production of Mechanical Work 387.
Marsden (E.) See Geiger and Marsden.
Mathematical notation and printing, practical suggestions on, 14.
Metallic films deposited by electrolysis, tension of (Stoney), 172.
Metals, determination of boiling points of (Greenwood), 396.
Micro-balances, sensitive (Steele and Grant), 580.
Miers (H. A.) and Isaac (F.) On the Spontaneous Crystallisation of Monochloracetic Acid and its Mixtures with Naphthalene, 184.
Monochloracetic acid and its mixtures with naphthalene, spontaneous crystallisation of (Miers and Isaac), 184.
Muirhead (A.) See Lodge and Muirhead.

Neon, note on a property of (Collie), 378.
Nicol (J.) The Rotation of the Electric Arc in a Radial Magnetic Field, 29.

Obituary notices of Fellows deceased:—

Kerr (John), i.
Bell (James), v.
Ellery (R. L. J.), vi.
Devonshire (Duke of), xi.
Baird (A. W.), xvii.
Shenstone (W. A.), xxii.

Objectives, apparatus for measuring defining power of (Hunter), 307.
Orionis, ϵ, origin of certain lines in spectrum of (Lockyer and others), 532.
Osmotic pressures, dynamic (Berkeley and Hartley), 271.

Palladium in vacuum tubes, new kind of glow from (Gill), 464.
Photo-electric fatigue of zinc (Allen), 160.
Platin-cyanides, hydrated, results of cooling, in liquid air (Reynolds), 380.
Poynting (J. H.) On Pressure Perpendicular to the Shear Planes in Finite Pure Shears, and on the Lengthening of Loaded Wires when Twisted, 546; —— The Wave Motion of a Revolving Shaft, and a Suggestion as to the Angular Momentum in a Beam of Circularly Polarised Light, 560.
Projectile, flight of rifled, in air (Henderson), 314.

Radiation from a black body, statistical form of curve of oscillation for (Wilson), 177.
Radium, charges on ions, produced by (Haselfoot), 18 ; —— emanation spectra obtained by different observers (Royds), 22 ; —— transformations, expulsion of radio-active matter in (Russ and Makower), 205 ; —— velocity of cathode rays from substances exposed to γ-rays of (Kleeman), 128.
Rayleigh (Lord) Presidential Address, November 30, 1908, 1 ; —— Notes concerning Tidal Oscillations upon a Rotating Globe, 448.
Revolving shaft, wave motion of (Poynting), 560.
Reynolds (J. Emerson) Note on the Results of Cooling certain Hydrated Platin-Cyanides in Liquid Air, 380.
Röntgen rays, passage of, through gases and vapours (Crowther), 103.
Rossi (R.) The Effect of Pressure on the Band Spectra of the Fluorides of the Metals of the Alkaline Earths, 518.
Royds (T.) A Comparison of the Radium Emanation Spectra obtained by Different Observers, 22.
Russ (S.) and Makower (W.) The Expulsion of Radio-active Matter in the Radium Transformations, 205.
Russell (Alex.) The Coefficients of Capacity and the Mutual Attractions or Repulsions of Two Electrified Spherical Conductors when close together, 524.

Shaw (A. N.) See Barnes (H. T.) and Shaw.
Shaxby (J. H.) On the Graphical Determination of Fresnel's Integrals, 331.
Shear planes, pressure perpendicular to (Poynting), 546.
Shenstone (W. A.) Obituary notice of, xxii.
Sheppard (S. E.) On the Influence of their State in Solution on the Absorption Spectra of Dissolved Dyes, 256
Ships, wave-making resistance of (Havelock), 276.
Simpson (G. C.) On the Electricity of Rain and its Origin in Thunderstorms, 169.
Solutions, mechanism of absorption spectra of (Houstoun), 606.
Specific heats of air and carbon dioxide (Swann), 147.
Spectra of the fluorides of metals of alkaline earths, effect of pressure on (Rossi), 518 ; —— of solutions, mechanism of (Houstoun), 606.
Spectrum of ϵ Orionis, origin of certain lines in (Lockyer and others), 532.
Springs, utilisation of energy stored in (Mallock), 387.
Steele (B. D.) and Grant (K.) Sensitive Micro-balances and a New Method of Weighing Minute Quantities, 580.
Stone circles, observations of sun and stars in. Fourth Note (Lockyer), 96.
Stoney (G. G.) The Tension of Metallic Films deposited by Electrolysis, 172.
Stream flowing through open channel, depression of maximum velocity filament in (Gibson), 149.
Strutt (R. J.) The Leakage of Helium from Radio-active Minerals, 166.
Swann (W. F. G.) The Specific Heats of Air and Carbon Dioxide at Atmospheric Pressure, by the Continuous Electrical Method, at 20° C. and at 100° C., 147.
Swinton (A. A. C.) A Further Note on the Conversion of Diamond into Coke in High Vacuum by Cathode Rays, 176.

Thornton (W. M.) The Measurement of Dielectric Constants by the Oscillations of Ellipsoids and Cylinders in a Field of Force, 422.
Thunderstorms, origin of electricity of (Simpson), 169.
Tidal oscillations upon a rotating globe (Rayleigh), 448.

Vacuum tubes, glow from palladium in (Gill), 464.

Water, surface-tension of (Bohr), 146.
Watson (H. E.) On the Wave-lengths of Lines in the Secondary Spectrum of Hydrogen, 189.
Wave-making resistance of ships: theoretical and practical analysis (Havelock), 276.
Waves, decay of surface, produced by a layer of viscous fluid (Harrison), 477.
Weighing minute quantities, new method (Steele and Grant), 580.
Wellisch (E. M.) The Mobilities of the Ions produced by Röntgen Rays in Gases and Vapours, 165; —— The Passage of Electricity through Gaseous Mixtures, 500.
Wilson (H. A.) Note on the Effect of Hydrogen on the Discharge of Negative Electricity from Hot Platinum, 71; —— The Statistical Form of the Curve of Oscillation for the Radiation emitted by a Black Body, 177; —— An Attempt to detect some Electro-optical Effects, 224; —— On Electrostatic Induction through Solid Insulators, 409; —— The Effect of a Magnetic Field on the Electrical Conductivity of Flame, 595.
Wilson (W.) On the Absorption of Homogeneous β-Rays by Matter, and on the Variation of the Absorption of the Rays with Velocity, 612.
Wireless telegraphy, syntonic (Lodge and Muirhead), 227.
Wires, lengthening of loaded, when twisted (Poynting), 546.

Zeleny (J.) Note (on deposition of oxides upon discharging points), 349.
Zinc, photo-electric fatigue of (Allen), 160.

END OF THE EIGHTY-SECOND VOLUME (SERIES A).

HARRISON AND SONS, Printers in Ordinary to His Majesty, St. Martin's Lane.
